## Spectacular Fire On Main Street

The burning of a truck loaded with gasoline-filled drums made a most spectacular blaze on Monday night and put the whole business section of the town in danger from the fire.

The truck, a 1929 Chevrolet, loaded with 11 drums containing 500 gallons of gas, together with oil and grease, was pulled up under the light at the Bank of Montreal corner, with the intention of refuelling.

During the refuelling operation the truck caught fire under the hood and immediately the whole truck burst into flames.

The explosion of the drums increased the danger and explosion of one of the drums sent it over the XL Garage, landing it behind the Adshere Garage, fully 300 feet away.

Fortunately the wind was from the west, which kept the flames mostly away from the buildings, but the windows in the Bank of Montreal were broken from the heat and the woodwork caught fire several times. The heat also broke the plate-glass windows in H. W. Chambers' store across the street and windows in the XL Garage.

Considerable damage was done by fire and water to the apartment and furniture of Mr. W. McFarquhar, who resides over the Bank of Montreal. The furniture was all new and the loss is estimated at about \$500.

The truck was owned by Mr. C. Kaikkonen, who, together with his son had been to Turner Valley for a load of gas.

## Injured in Car Mishap.

Mr. Chas. Cook was seriously injured on Friday evening while driving a car between Didsbury and Carstairs. It appears that he was driving with his arm out of the window and that the arm was struck by a passing truck. With the impact he swerved into the rear of the truck, which badly damaged the car. Cook was taken to Calgary for X-ray and it was found that the bones in his elbow were fractured. He is at present in the Didsbury Hospital.

## Tuberculosis Test Still Free Service

It has been brought to our attention that the federal department of agriculture does not now pay compensation for cattle reaching tuberculosis test, except in the case of purebred herds tested under the Accredited Herd Plan, or in area testing.

However, the owners of herds formerly dealt with by the department under the Municipal Tuberculosis Order, or any others interested, may still have their cattle tuberculosis-tested, by signing an application form which each veterinary inspector carries with him, and which is an agreement between the department and the owner regarding this work. The inspector will be glad to explain the matter fully when called upon by anyone interested, irrespective of whether or not the owner ships sweet cream milk.

This service by the federal veterinarians is given without cost to the cattleman, and the farmer is not required to provide transportation as was previously reported.

## LOCAL & GENERAL

Mr. and Mrs. Harder, who have been visiting in California, returned home last weekend.

Mr. and Mrs. Wordie and family motored to the coast last week for their vacation.

Miss Mary Moroney, of Edmonton was a visitor at the Ranton home this week.

Jack Currie, who was relieving at Jenkins' in Three Hills, is again behind the counter at the local grocery.

Messrs. Clifton Robertson, of Los Angeles, and Orville Bellamy, of Salmon Arm, are visiting with Mr. and Mrs. Cliff Bellamy.

Mrs. G. R. Marcellus and daughter Irene, of Calgary, are visiting with her son, Mr. C. E. Marcellus and family this week.

Clint Reiber and Tommy Johnson returned Thursday last after spending their holidays around Rossland and Trail. While at Trail they were shown around the smelter and commercial fertilizer plant.

Mr. Goldwyn Liesmer, who has been visiting his parents, Mr. and Mrs. John Liesmer for the past two weeks, returned to Jerome, Penn., where he is employed as a chemical engineer.

Mr. Chris Rapien is exhibiting a set of triplet vegetable marrows which he has grown in his garden east of town. The three marrows are well formed, but are joined together along the sides.

Miss Joyce Brown, daughter of Mr. and Mrs. Stanley Brown, had the misfortune to break her leg last week when she was thrown from a rig. She was taken to the General Hospital at Calgary and is reported to be progressing nicely.

Mr. Harvey Speelman, of the Builders' Hardware has just refinished his car with the new Liquid Colophane and is real proud of the job. He says you can do it yourself. Call on him and he will tell you all about it.

Among those who took advantage of the excursion rates to the coast last weekend and are spending their holidays at Vancouver and Victoria are: Mr. and Mrs. J. Boorman, Mrs. Ab. Hunsperger, Miss Lettie Hunsperger, Miss Aleda Hugel, Mr. H. W. Chambers and Mr. J. F. Skoyles.

## Bawlf Elevator Again in Operation

The instalment of machinery at the new Bawlf elevator was completed last Friday and the first load of grain was received at the elevator on Monday.

The new elevator is equipped with all the latest devices for handling grain and all electrically-driven. A Westinghouse 7 1/2 horse power head-drive motor provides the power and a Carter disc-cleaner has been installed.

## WEDDING

### PACK-SHELLS

The Knox United Church, Lethbridge, was the scene of a pretty wedding on the Saturday afternoon of August 26th, when Miss Beatrice Shells, daughter of Mr. and Mrs. James G. Shells, of Didsbury, became the bride of Mr. Lambert R. Pack, of Raymond.

Miss Lenore Pack attended the bride, and Mr. Lowell Court, of Raymond, supported the groom. The ceremony was performed by Rev. J. M. T. Pritchard in the presence of a number of friends.

Mr. and Mrs. Pack will take up their residence at Raymond.

## Notice to Relatives of Persons On the Assessment Roll And to Tenants

Notice is hereby given that during the months of September and October applications may be made under the provisions of section 204 of the Town Act for inclusion in the voters' list of the Town of Didsbury.

The wife, husband, father and mother, and every son and daughter of any person whose name appears upon the assessment roll, are entitled to be placed upon the said list—

- (a) if he or she is a resident with the said person within the town or assist him in a business in respect of which he is taxable; and
- (b) if he or she is of the full age of twenty-one years; and
- (c) if his or her name does not already appear on the roll; and
- (d) if he or she duly makes application in accordance with this notice.

All tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year, and who duly make application during the months of September and October are entitled to be placed upon the said list.

## Nature's Laws

In these days much is said and written on the subject of planning—farm planning, industrial planning, social planning, financial planning. Economists, both those who have made a life study of economic principles, trends and problems, and those who assume to speak on economics but have only a superficial knowledge of the subject, are talking and writing on the subject of planning. Governments the world over are engaged with the subject, and world conferences are wrestling with it. As a result, people are confused with the multiplicity of ideas advanced, as in the majority of cases, one set of ideas is contradicted by another set.

However, out of the confusion, there has come the suggestion that nations everywhere should reverse the process they have been following of increasing and expanding production and proceed to curtail production. So, we are told, farmers should reduce the acreage they are planting to wheat and cotton and coffee; miners should mine less copper, iron, silver, zinc and tin; smaller quantities of oil should be pumped from the bowels of the earth; fewer fish should be caught; less timber cut; smaller quantities of manufactured articles turned out.

The suggestion is an absurd one. The population of the world is steadily, even rapidly, increasing, and people want more of everything, not less. Why then produce less to meet their needs? The problem that calls for solution is not that there is too much wheat in the world, or that too much of it is being produced annually, but that certain countries for purely national reasons are denying to their people the right to import wheat and in so doing are denying to them the privilege of cheap bread. And what applies to wheat, applies in varying degrees to all other products and commodities.

Nature with her immutable and inexorable laws has a way of controlling production. In this year of 1933 when the story of huge wheat surpluses is heard on every hand, Nature stepped in and reduced the wheat crop of the United States by two hundred million bushels, and struck tens of millions of bushels off the Canadian crop; and reduced the yield in other countries. Drouth, and hail, and grasshoppers, and other insect pests all took their toll, and as a result the world will not produce more wheat than its inhabitants require.

Suppose the acreage sown to wheat, for example, was arbitrarily curtailed by order of governments. Farmers would be obliged to summerfallow the land not needed to prevent it becoming infested with weeds. It will be acknowledged that the more carefully and intensively the land is worked and cultivated, the greater the production per acre. Consequently, the almost certain result would be that larger average yields would be obtained, and the reduced acreage in crop would be offset to a considerable extent by the heavier yields. Therefore, even assuming that less wheat should be produced, reduction in acreage sown might not solve the problem. It may be admitted that there would be an economic saving to the farmer in increasing his yield per acre and sowing fewer acres. Possibly farmers should have followed this practice in the past, and should do so in the future, but not with the object of raising less wheat, but better wheat and more of it per acre at less cost to himself.

And if man decided in his wisdom, or lack of it, to greatly reduce the production of wheat in any one year, Nature might likewise in that year enforce certain of her laws to bring about a reduction, with the result that man might easily find himself in dire need. Or Nature might offset the puny efforts of man and order climatic and other conditions which would more than offset all man's efforts to lessen production.

Man stands impatient when drouth comes and day follows day without rain, he is powerless when hail lashes his grain crops to the ground; he can cage but a futile battle when grasshoppers and other pests swarm over the land; he can do nothing if a blighting frost destroys. But Nature has her own ways and methods of control. When grasshoppers increase, a parasite develops which ultimately destroys the hoppers; when rabbits become unduly numerous, disease takes them off. Man may wage war against this or that, he may plan and seek to control, but in the final analysis Nature directs and controls.

There are men who in this day and generation propose to plan and control practically everything; who declare that old laws of supply and demand, of the survival of the fittest, are obsolete, and should be ignored, or overcome. These things, they say, are merely the laws of the jungle, which should have no place in our modern civilization. But the laws of the jungle are Nature's laws. In the jungle Nature rules supreme, and it is a jungle because no attempt is made to interfere with Nature.

Man may, and can, and does control some of the powers of Nature. Working with Nature he can bring about many improvements, and may even control Nature in some of its aspects and workings. But with many of Nature's laws and workings, man can exercise no control whatever. He cannot lengthen or shorten the seasons, he cannot determine the weather, he cannot order the earth to bring forth bountiful crops this year and less than normal crops next year. And he better not try to do it.

The real trouble with the world today is that man has tried to control Nature's law of supply and demand by setting up an intricate network of man-made restrictions, obstructions, barriers, prohibitions, which interfere with the natural working of that law. As a result man has put himself into a huge spider's web of his own making in which he is struggling in futile fashion. He can only free himself, not by a further defiance of and interference with Nature, but by destroying the web he has woven to his own undoing.

## Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unusual discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 38 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it, your drug or general store; put up only by The T. Millum Co., Limited, Toronto, Ont.

## Canada's Taxed Property

## Total Taxable Real Estate Is Assessed At Eight Billion

The total taxable real estate in Canada was assessed at \$8,222,260,000, according to reports received by the Dominion Bureau of Statistics, for the year 1932.

Another \$1,500,000,000 of assessed property was exempt from taxation, consisting chiefly of Dominion, provincial and municipal property, and educational, charitable, and religious institutions.

Quebec led with \$755,798,000 of exempted property, Ontario, \$334,536,000, Manitoba, \$156,791,000, British Columbia, \$149,275,000; Nova Scotia, \$148,119,000, Prince Edward Island, \$138,285,000. The returns from New Brunswick, Saskatchewan and Alberta do not show the amount of the non-taxable property.

The total taxable valuations in Canada were \$8,722,110,000, of which Ontario had \$3,183,152,000; Quebec, \$2,223,476,000; Saskatchewan, \$1,134,610,000; British Columbia, \$888,096,000; Alberta, \$820,745,000; Manitoba, \$577,163,000; Nova Scotia, \$177,216,000; New Brunswick, \$153,065,000; Prince Edward Island, \$39,302,000.

Taxable real property, amounting to \$8,222,260,000, was distributed as follows: Ontario, \$2,811,765,000; Quebec, \$2,210,945,000; Saskatchewan, \$1,089,729,000; British Columbia, \$888,096,000; Alberta, \$579,960,000; Manitoba, \$539,012,000; Nova Scotia, \$140,197,000; New Brunswick, \$139,053,000; Prince Edward Island, \$32,696,000.

## Change Hardly Noticeable

## American Inch Unit Now Two-Months Less In Length

The American inch unit of measurement has lost two-millionths of its former length in order that precise measuring in the United States and England may be done on the same basis. The new definition of the inch is now 25.4 millimetres—a difference of about one-eighth inch in a mile as compared with the former American standard. This minute alteration was made necessary by modern precision manufacturing, and the confusion arising from varying standards in the two countries. Gauge blocks now are made correct to within one-millionth of an inch. Both the United States bureau of standards and the national physical laboratory of England will certify industrial gauges on the new basis.

## Looking For Sandy Beaches

## Stefansson Septical and Mounties Are Going To Search Arctic

Seeking sandy beaches under icebergs will be part of the R.C.M.P.'s arctic patrol work the next two years, for as the "Nasopico" sailed recently bearing about "Mounties" to be stationed in the polar regions of Canada for the next two years, they had instructions to look for sandy beaches.

The night before the "Nasopico" sailed, Vilhjalmur Stefansson, famous explorer, wired Gen. T. H. MacBrien, commissioner of the R.C.M.P., asking him to enlist the co-operation of the red-coats, in searching for sandy beaches under the ice. The wire stated that Stefansson had never recalled having seen one, and he wanted to confirm his own experience.

## Rewarded For Kindness

## Welsh Girl Receives Legacy For Helping Old Lady

An old lady of Swansea who lost her money while travelling fifteen months ago met a girl at Cardiff Railway Station and told her of her difficulty. The girl lent her 10s. T's money was returned by post shortly afterward.

A few days ago the girl, Miss Jean Davies, a pretty brunette, engaged as a shop assistant at a hair-dresser's in Pontypridd and living at Senghenydd, received a solicitor's letter. The latter informed Miss Davies that the old lady had died and left her £3,000.

## London Police Versatile

London policemen, who already must have a practical knowledge of first aid, car driving, swimming and life saving, are now to be trained as firemen, so that they may be equal to the task of rescuing persons from burning buildings.

## Professor Raps Modern

## Method of Education

## Says Students' Mind Clogged With Dead Matter

Modern methods of education clog the mind and as the result modern young people are class conscious, readily ignorant, selfish and arrogant, their minds filled with dead matter.

This slashing attack on modern methods of education was made by Dr. William Oliver, professor of the School of Organization and Industry at Edinburgh University, Scotland, in an address at the annual conference of the textile industry held in Harrogate, England.

"Modern education tends," Dr. Oliver said, "to hinder mental development by clogging the mind with dead matter. Education has become too pedantic, and in consequence distrust had arisen between men interested in education and men interested in industry."

"The idea that education should relieve its recipients of manual labor was prevalent, and it has been strengthened by the evolution of staff appointments mainly dealing with clerical duties. Manufacturers were largely to blame for appointing their managers from the office, rather than from the machine."

"It is distinctly unfortunate that much of the present day educational process is developing a class of young people who do not wish to work in factories, or indeed to work at all. Many 'liberally educated' young people are really ignorant, selfish and arrogant."

"Wherever a man gets above the dead level of lower education, he becomes obsessed with the idea that his family should have an easier time than he has had. He fails to see that his hard work has been the essential factor in any success he has achieved."

## Aquarium That Is Different

## Queer Fish Kept In Refrigeration Rooms At Port Of Seattle

In a frozen aquarium, believed by officials to be the only one of its kind, strange fish from many waters stare stonily at thousands of visitors at Seattle every day. The aquarium was not planned, it just grew. Harry E. Larson, of the port of Seattle, explains, until it is becoming world famous. One day a fisherman brought in a strange fish and wanted to hang it up in the refrigeration rooms. Then another caught a different variety, rare in these waters. So it grew until there is now a collection which has attracted as many as 1,500 visitors to the plant in a single day. They brave a temperature of ten degrees below freezing to walk through the corridor with ice-encased rarities of the deep.

## For Safer Flying

## Device Lands Passengers Safely From Disabled Plane

A device which ejects passengers from disabled cabin aeroplanes and lowers them safely to the ground with parachutes was demonstrated successfully at Roosevelt Field, New York, before a group of air line officials and prominent aviators.

At 150 feet, lower than is considered safe for a parachute jump, eight dummies were dropped successfully from a test plane then two parachute jumpers were dropped from 1,500 feet.

## Proves Value Of Advertising

## Reading Newspaper Ads Often Creates Desire To Shop

The value of newspaper advertising to shoppers and advertisers alike was shown at St. Louis, Missouri, in a survey conducted by advertising students of a local senior high school. Of those interviewed, 1,289 out of 1,345 said they generally read newspaper advertising before planning a shopping trip, while 1,322 out of the total interviewed said newspaper advertising often created a desire to go shopping when there had been no plans to go.

About the first thing a physician does is to examine the patient's tongue, probably to see if it will tell what he is worth.

Police of Glasgow, Scotland, are rounding up counterfeiters.

## SAVE THE POKER HANDS

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

## Loaned Money On 'Plane

## Kansas City Pawnbroker Kept Promise To Take Anything

Ben Hurst, Kansas City, Mo., who advertises the "chugger" pawn shop west of the Mississippi, and who boasts that he has never refused a loan on anything that had a tangible value, was in a quandary recently.

Willard Herman, Oregon, Mo., wrote Hurst that he needed \$250 and had a good aeroplane he could put up as security.

Hurst thought the whole thing over, decided he could rent a hangar to keep the aeroplane in and told Herman, by mail, to come get his money.

## Test Was Satisfactory

First test of the Dymnax car, three-wheeled automobile built on the stream-lined principle of fast boats, was held at Bridgeport, Connecticut, before 3,000 spectators. With its inventor and designer, Backmaster Fuller at the wheel, the automobile attained a speed of 70 miles an hour over the one-third mile cement test road at Seaside Park.

Bright red handbags are vogue in Germany.

W. N. U. 200

## Better Distribution Needed Rather Than Restricted Acreage When Many Are Lacking Food

"As long as so many people in the world are starving, there is no sense in reducing acreage," Neil S. Boston, president of the Scottish Co-operative Wholesale Society considers. "The right thing is to raise the standard of living of the people so that they can consume nature's bounty instead of restricting it. The world has succeeded in production, it must apply itself to distribution. That is the main object of the consumers' co-operative movement," he declared.

Members of the delegation from the Scottish Society, discussing the question at Saskatoon, did not consider that the maximum possible consumption of bread had been reached. In Scotland when potatoes were cheap the consumption of bread fell to rise again when there was any potato shortage, one of the delegates pointed out.

The representatives of the society visiting the west were: Mr. Boston, Alexander Buchanan, a director, and William Smith, grain buyer and manager of flour mills. They were impressed by the prosperity of the society in Saskatchewan which includes nine grain elevators. They later attended the wheat conference at Regina and the conference of the Co-operative Union also held there during the time of the World's Grain Show.

The Co-operative movement in Scotland had more than held its own during the depression said Mr. Boston answering a question. The sales of the Wholesale Society had remained steady at about 16,000,000 pounds for the past four years, but at the lowest of prices this involved a considerable increase in bulk of goods.

The wholesale organization was employing more people than before the depression, at the end of 1932 there were 10,567 employees, an increase of 200 over the previous year. The 250 retail societies had 774,770 members and as these were usually heads of families they represented the majority of the four and a half million people of Scotland. They had 20,000,000 pounds in share and loan capital in the society.

It was intended to open shortly a lineal factory at Falkland in Fifeshire costing 100,000 pounds. Other new ventures were a creamery at Kilmarnock and extensions to grocery warehouses at Glasgow and Dundee and to the fish curing station at Aberdeen.

### People Turn To Religion

#### Statistics Show Church Membership Increases In Hard Times

The religious fervor is a corollary of hard times is well known and is confirmed by the annual statistical report of the Christian Herald, showing church enrollment increased 929,252 in a single year. While one out of every six banks was wiped out, one out of every 45 households forced to close, one out of every 22 business and industrial institutions forced into bankruptcy, only one of every 2-34 churches suspended during the depression, according to the Herald. Newspapers seem alive to the interest in the religious field. The managing editor of the New York Sun says that a religious pictorial feature, four-column reproductions of famous etchings depicting thrilling episodes in the Book of Books, has brought in an unusual volume of favorable comment. Editor and Publisher, New York.

#### Youngest Woman Barister

Miss Yvonne Stranger, aged 21, who has just been called to the bar of the Middle Temple, London, is the youngest woman barister in the United Kingdom. She passed her examination some time ago, but had to wait until she became of age before being called.

#### Sheep In New Zealand

New Zealand has more than 280 sheep to the square mile, and over 20 to every man, woman and child in the Dominion, according to a recent census New Zealand is boasting that the large sheep increase is because the country has no droughts.

W. N. U. 2005

### Permits Rest With Mounties

#### People Wanting To Carry Firearms Have To Prove Crime

Canada has been tightening up on its law regarding the carrying of revolvers. A law enacted at the recent session of Parliament makes it more difficult for a resident liable to possess a pistol or revolver, affords the penalty for illegal possession of such a weapon, and so is expected to have an important effect in the unending war on crime. In the past revolvers might be carried by private citizens who held permits issued by police authorities. Permits, supposedly were issued only for the protection of life and property, but there was uniformity about the interpretation of circumstances which might justify their issuance. The number of permits in most cities never was large and Ottawa, for instance, with 125,000 people, had no more than a dozen or so held in the main by bank messengers.

In order to tighten the regulations, and to make it still more difficult for revolvers to fall into possession of desperate characters, parliament has enacted that for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police and by provincial police authorities. Magistrates and municipal police are denied further rights in the matter.

All permits in existence were automatically cancelled as from July 15, and their holders must prove their claims anew before a broader tribunal.

Any person found in possession of a revolver for which he has no legal license is liable to five years in the penitentiary. — Regina (Evening) Leader-Post.

### Hudson Bay Fish

#### One Thousand Pounds Of Herring Shipped Weekly From Churchill

There is no doubt that commercial fishing may be carried out with success in the Churchill region providing freight rates are reasonable, and there is a fair price on the prairie, according to Tom Ridbeck, trading agent for the Hudson Bay company, post operator who is acting as agent for buyers in the south.

"We are shipping more than 1,000 pounds of fresh sea herring to The Pas, Saskatchewan and Winnipeg, every week," said Mr. Ridbeck. "We can fill all orders. The fish are caught by trappers living here, and are secured just prior to the departure of the trains so they will be in an excellent condition on arriving in the cities."

"The freight rate is now such as to enable age buyers. We have a rate of \$155 to The Pas by freight, and this has helped a lot. If a further reduction were made, I'm sure we could increase the business."

With the next high tide, we should be getting salmon trout, a real lassy fish which will make a hit on the prairies.

Ten thousand skiffs and 1,000 motor boats are for hire on the River Thames in England.

Work on farms is reducing unemployment in the Irish Free State.

## Exhibit Of Canadian Paintings Now Being Shown In Britain Has Achieved Popular Acclaim

### Japanese Keep Old Festival

#### Believed To Have Come From China About 750 A.D.

Festival of the Seventh Eve of the Seventh Month—The Tanabata Matsuri (the festival of Tanabata)—was observed by children at some primary schools in Tokyo and suburbs recently. They were celebrating the Seventh Eve of the Seventh Month, when the Weaver Princess Star (Star Vega) is supposed to meet the Herdboy Star (Star Altair) on the sky once a year on the banks of the Milky Way.

Virtually all but the memory of the festival had disappeared in the cities until a few years ago, when it was revived. The festival is essentially a children's affair and used to be observed in the homes. Tall bamboo trees erected on the school playgrounds were a flutter, with their branches hung with daintily cut papers of varied sizes and colors, bearing short poems. They sing beautiful thoughts and sentiment in praise of the sky princess, the sky herdsboy, the Milky Way, the Seventh Eve love-making, and all the wonder and mystery of the heavenly elements.

The festival is said to have come from China during the reign of the Emperor K'ien-Lo (756-762 A.D.) and already had become fashionable in the 8th century. It was essentially of religious significance when it first came to Japan, but has become an affair of literary interest as it has been interwoven into the life of the Japanese people.

### Value Of Farm Land

#### Like Everything Else Worth Only What It Can Earn

What is good farm land worth? An Englishman stated not long ago that the best land in England, where the average production per acre of all crops is much higher than in Canada, the market is at the door, the growing season is longer and the climate, generally more favorable, can be bought for \$100 or less per acre when it can be bought at all. With an experience of two thousand years behind them, English farmers are pretty likely to know what values are. We doubt whether any land in Canada can earn interest on a very much higher valuation than that, except in a very few highly favored spots, and then only by intensive cultivation of high-priced perishable fruits and garden truck. One of the principal causes of much of the present trouble of farmers is that they paid, or promised to pay, more for their land than it was worth, and their mortgages represent more than the actual value. Land, like anything else, is worth only what it can earn.

Paris police have been equipped with fountain pens which eject tear gas.

### WHAT'S IN A NAME?—PLENTY!

When Norma Shearer, famous Canadian film star, returned to New York from Europe she was besieged by members of the crew for her autograph. Here is the screen actress obligingly signing for an admiring sailor film fan.

The show of Canadian water colors now touring Great Britain, has achieved remarkable results. The stimulus provided by the exhibition in Great Britain comes mostly from press comments and purchases. Among the interesting statements are those of O. D. Skelton, parliamentary secretary of state for Scotland, who says they show the Dominion "in on the high road to developing a national school of art of its own. Dignity was found in the pictures, along with brilliance of color, breadth of view, and a large and solemn quality in the best of them which perhaps could not be found so easily in an island school of painting. We realize at once these pictures came from the heart of a great country."

"The majority of the Canadian artists," says the Glasgow Evening Herald, "have departed from the traditional use of the medium, depending on bold contrast and emphatic delineation of form to secure effects."

"It is high time that we saw what artists in other parts of the empire are doing," says the Glasgow Evening Times. "If they are painting with the same imagination, and have developed as vigorous a technique as these Canadians, they are on the disposal scenery on a scale unknown to reproduce the ready-made pictures of their far-flung countryside, of their towering mountains, or their vast lakes. Most of them avoid facile naturalism. They see their landscape pervaded by a spiritual quality and they interpret this in terms of arresting design and decorative color."

"The Canadian painters are not afraid to use water colors in broad, sweeping terms," states the Edinburgh Dispatch. "The result is some very clean-cut paintings, brightly colored, and exhibiting a distinct individuality which compares favorably with many admirable works in the other galleries."

"Peter Haworth's Rocks Nova Scotia has a startling, clean-cut attraction, a coast scene made remarkable by firm treatment and consistent draftsmanship," states Robert Hurd, the critic. "The almost architectural character of some rock scenery can materially aid the painter in composing his picture, more especially in giving an expression of massive solidity, and Peter Haworth has exploited this means fully. We realize when looking at this scene, such as in our drawing, how much the labored sentimental pictures of foam-sprayed cliffs that we see dotted in our public galleries are the exact antithesis to this typically virile Canadian painting. With Ogilvie is the most advanced artist in the Canadian group. Canadian pictures on the whole are frankly representative of land or seascapes, but Ogilvie makes use of symbolism, as in his 'Morning Sun' and 'Rhythmic'."

### Seagull Brought Companions

#### About Three Hundred Visit Utah Woman Every Day

Mrs. Bayard Chambers, of Salt Lake City, Utah, fed a lone seagull several years ago and, as a result, now feeds approximately 200 daily. The bird was first and hungry. When Mrs. Chambers fed it, birdie trips were made, with companion birds appearing in ever-increasing numbers.

Seagulls in Utah are virtually tame, due to a rigidly-enforced rule now making their destruction a serious crime.

### Sounded Like One

A man from Montreal was peering into the depths of the Grand Canyon. "Do you know, asked the guide, 'that it took millions of years and this great abyss to be carved out?'"

The man from Montreal was tremendously impressed. "You don't tell me," he continued. "Why I didn't know it was a government job."

Automobiles and motor boats are being traded in on aeroplanes in London, England.

By Ruth Rogers

### PARIS IS MAKING A POINT OF WIDENING SHOULDER IN JACKET SUITS

The suit costume is of chief interest for daytime wear.

And here this model tremendously good looking? It is a conservative novelty checked pattern in light navy blue woolen. The corseted crepe silk bodice of the dress, lends an extremely light touch. Note the sporty scarf neckline. The skirt attached to the bodice in a slinging fashion, is gently shaped.

Boudier woolen, this style is suitable for crepe silk. And it is stunning in a small patterned silk crepe in red and white. Make the blouse of plain white crepe silk.

It's easily put together. The saving in cost is well worth the small time it will take you to make it.

Style No. 734 is designed for sizes 14, 16, 18, 20 years, 26, 28 and 40 inches bust.

Size 16 requires 4 1/2 yards 30-inch or 2 1/2 yards 36-inch with 1 1/2 yards 20-inch contrasting.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## Alberta Crop Report.

Cutting of the wheat crop in Alberta has commenced and is fairly general in all parts of the province save in the more northern districts. Cutting of coarse grains has also commenced in certain districts. The crops have ripened so rapidly under the continued warm, dry weather that harvesting has become general somewhat earlier than is usual.

While the department is not at present issuing an official estimate of what the average yield of wheat over the province is likely to be, it has become certain that the total harvest of wheat will be far below that of 1932. Over a fairly well defined area in the southeastern part of the province, described roughly as extending from the South Saskatchewan river north to Township 33 and from Range 15 to the eastern boundary of the province, excluding irrigation areas, the crops have largely failed due to drought, and a very large percentage of the seeded area here will not be harvested, while on the balance the yield will be very light indeed. Over the balance of the province, aside from this area, there will be a medium crop of wheat with estimates of yields ranging from 10 to 15 bushels in districts immediately adjacent to the drought area both south and north, to as high as 25 bushels in a few favored districts elsewhere in the province. Along the southern fringe of the province west and southwest of Medicine Hat, some fairly good yields are expected. The Peace River and Grande Prairie districts report conditions good, with prospects of good yields, though rain would be welcome in a few sections to aid the filling process.

As might be expected, the drought conditions affected the coarse grains more seriously than the wheat, and in most districts in the central and southern areas there will be a distinct shortage of greenfeed and other feed crops, although as in wheat there are districts in the north central areas more favored in this respect. An unusual situation has developed this year in the foothill cattle country between High River and Pincher Creek, where pastures have burned under the prolonged dry, hot spell. Here, as in the dried-out crop areas the feed situation has become more or less acute. The whole feed situation is now being reviewed by the department to ascertain what action may be necessary.

### WEEKLY SERMONETTE

"One day at a time, and make that count."

### WEEKLY JOKE

The two men were adrift in an open boat and it looked bad for them. Finally, one of them began to pray.

"O Lord," he prayed, "I've broken most of Thy commandments. I've been a hard drinker, but if my life is spared now I'll promise Thee never again..."

"Wait a minute, Jack," said his friend, "don't go too far, I think I see a sail."

## Here is Here.

An official statement of only one tree which has borne 111 different varieties of apples and one variety of pears by means of careful grafting is located in Eastern Canada. This season 47 varieties of apples and 14th blossom.

Canada produced 1,255,423 ounces of silver during March as compared with 1,367,141 ounces in February and 1,254,177 ounces in March 1932. 2,575,818 ounces were produced during the first quarter of 1933, a 17 per cent decline as compared with the same period in 1932.

Hon. Frank L. Tolt, acting secretary of state for the United States in 1918-19, well-known corporation lawyer and director of many companies including the Chase National Bank and the Northern Pacific Railway, is staying at the Banff Springs Hotel with his family for the summer vacation.

More than equalling expectations the New York-Montreal cruise of the Duchess of Bedford, set a new holiday record for special trips recently when 900 passengers took the excursion. Guaranteed a romantic moon every night and a picturesque run down the St. Lawrence, the passengers embarked steadily at the rate of three to the minute for five hours.

Wheat-cutting is now general in Manitoba and under way in the other prairie provinces, according to a recent weekly report issued by J. M. McKay, general agricultural agent, Canadian Pacific Railway, Western Lines. There is still, however, great need for further moisture, especially in the central and southern parts of the grain-growing provinces.

Fresh from a victory in which he carried an appeal for a Chinese sentenced to hang to the Privy Council ending in commutation to life imprisonment, Rev. Father Joseph S. Donovan, of Marysville, B. C., landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

Seeking the big fish he talked catching when he was invited to accompany their Majesties the King and Queen of Spain to Campbell River in September 1931 during their Canadian-American tour, Brig. General E. de B. Paet, chief of the Canadian Pacific Investigation Department, is on a trip to the waters of the fighting type, one of the prize game fish of British Columbia lakes and streams.

Cultural and educational relations in the Pacific will be stressed at the fifth Biennial Conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 24-25, though economic problems will naturally be to the fore in the discussion, noted Miss Elizabeth Green, editor of the Institute's Journal, on her arrival aboard the Empress of Canada at Vancouver recently en route for Banff.

**Councillors Must Watch Their Step**

Municipal councillors charged with the expenditure of public money in their respective divisions will have to watch their step hereafter if a magistrate's judgment recently delivered at Leduc is accepted as a logical interpretation of the law.

Two men, one a councillor, and the other an ex-councillor of a rural municipal board, were charged in court with over-expending the tax revenue allotted to them by the council for the area over which they exercised personal responsibility. They were found guilty and fined by the magistrate, notwithstanding the fact that there was no evidence offered of "padding" payrolls or any criminal misdoings. The defence merely admitted that there was urgent need for the work accomplished and that farmers indeed were allowed to turn their tax indebtedness into highway improvement.

So far as can be ascertained this was the first instance on record in the province where elected representatives had to take responsibility for the tax sums entrusted to their supervision.

—Calgary Herald of August 3.

**Junior Grain Competitions.**

Judging is now in progress by officials of the provincial department of agriculture of the field crop competitions of the junior grain clubs. There are this year 117 of these competitions, an increase of 45 from last year. Of these 46 are wheat, 31 oat, alfalfa 31, barley 7, corn 1, and potatoes 1. Membership in the grain clubs now totals 1,383, and the clubs extend from Bow Island on the south to Gravelly and Grande Prairie on the north, and as far west as Edson.

**High School Courses By Mail.**

For some years the provincial department of education has conducted correspondence courses in the elementary grades of school for the convenience of those unable to attend a school. Some 2,500 or more, chiefly those in outlying parts of the province, have taken advantage of these. It is now the purpose of the department to extend these courses to include instruction in all four grades of high school work, with the exception of commercial and technical courses. A small fee of \$8 per unit taken will be charged to cover administrative costs.

**Alberta's Success at Regina.**

A review of the winnings in the various seed grain classes at the world grain congress at Regina recently, shows Alberta's total prizes to be \$24,500, with an additional \$1,700 won by members of the junior, intermediate and inter-college grain judging teams. Cash prizes taken constituted more than one-third of the prize monies offered in the classes concerned. In two classes of wheat Alberta took 85 per cent. of the money, and in two classes of oats won 80 per cent. of the money.

**Prince's Ranch Model at Toronto.**

The model of the Prince of Wales' ranch which attracted much attention at the Regina grain congress, is to be removed to the Toronto national exhibition and will also be on display at the Royal winter fair. The model is 120-ft. long and is an almost perfect replica of the ranch in every detail.

**Summer School Attendance.**

A total attendance of 870 was recorded at the annual teachers' summer school just closed at the University of Alberta. This compared with 981 last year. The school was operated by the University and department of education.

**"42nd Street" Makes Big Hit**

With "42nd Street" Warner Bros. ring up the curtain on the wonder of a new show world with a glittering star-spangled extravaganza of cinema, burlesque and song, eye-buzzing beauty. The most lavish production ideas ever conceived by the miracle minds of Hollywood!

It has a feature cast of 50 featured players and a wonder chorus of the 200 loveliest girls ever assembled in one cast after Broadway's beauty connoisseurs had watched the earth! "42nd Street" will be the feature picture at the Didsbury Opera House this Friday and Saturday.

It is worth \$10.00 a seat, but you can see it at regular prices!

**Three Canadians Win Scholarships**

Three university scholarships out of seven offered by the Fisher Body Craftsman's Guild to boys who build the best miniature model Napoleonic coaches in North America, go to Canadians.

On the night of August 16th before 114 state and provincial winners attending the Century of Progress Exposition, the Guild announced that Joseph Olafson, of Leduc, Sask. and David Tennant, of London, Ont. had tied for the first senior scholarship, and because of the dead heat a last minute decision was made to award both boys the \$5,000 that will give them college educations.

The third Canadian scholarship winner was another London boy, Richard H. Guthrie, who ranked first among the juniors.

WORLD HAPPENINGS  
BRIEFLY TOLD

Max von Schilling, an outstanding figure in German music for nearly 40 years, is dead. He was 63 years old.

Australia has made large shipments of gold to London in the last few months.

Profits of the South Manchuria Railway have greatly increased during Japanese occupation.

Judge Chier, British jurist is demanding that Holyday prison be made less comfortable.

Study of accounting and auditing methods that prevail in the western provinces is to be made by three officials of the Ontario Government.

Thousands turned out to welcome Lord and Lady Bessborough on the occasion of their first visit to Cape Breton island.

Motor cars exported from Great Britain this year exceed in value those shipped last year by almost 100 per cent.

The first load of wheat, offered to a Bradford, Ontario, mill from the 1933 crop, brought 75 cents a bushel, compared with 40 cents for the first load last year.

Flood, drought, famine and heat and plagues of cholera, locusts and rats are variously reported in widely separated parts of China, causing suffering and death.

Robert Brooks Harris, 74, founder of the Hamilton Herald, died at his home recently. With his brother, the late J. M. Harris, he started the Herald in 1880. Mr. Harris retired from the business some years ago.

Miss Anna Blain Thornton, daughter of the late Sir Henry Thornton, formerly president of the Canadian National Railways, was recently married to Dr. Winston F. Harrison, of New York and Montreal.

A brisk demand exists in Great Britain for cattle from the Canadian west, and that should be a big factor in making the first livestock shipment via the port of Churchill a success, stated Col. H. A. Mullins, M.P. for Marquette.

Men, women and children on unemployment relief allowances in British Columbia have been reduced from a peak of 129,000 in March to 109,000 at the present time. The government expects a further decline during the summer months, but is not so optimistic about the late fall and winter.

## Age Is No Handicap

Eighty-Two Year-Old Woman Keeps Active Control Of Reverses

Said to be the only woman brevery president in the country, 82-year-old Mrs. Jacob Hornung is directing the production of her Philadelphia brewery.

When her husband died eight years ago she decided that she would take charge of the plant and continue making near beer. Then, with the advent of real beer, she found herself in the midst of humming activity.

Some of her friends say she is 86, others that she is 82, but she insists she feels 16.

She is at her desk in the brewery every day and some mornings she arrives at 7 o'clock to see "who comes late."

## Should Advertise In Canada

If British goods, even with a tariff preference, are to find a proper market in Canada they will have to be advertised here. Canada is undertaking an advertising campaign in Britain and if the full benefits are to be reaped from the Ottawa agreements, a similar campaign should be carried on in this country on behalf of United Kingdom and other Empire goods.

## Was New Once

Sheffield, England, decided to clean up its recent progress and beautify campaign by having an up-to-date mail box in the post office. An appeal to the government brought prompt action and a "new" box was installed. Inspection has revealed the letters "V.R." on the box, showing that it had been made in the time of Queen Victoria.

Horsehoes have been listed in Chile as a prime necessity and placed under government control.

W. N. L. 1935

## Founding Of Canard Line

First Regular Steamship Service To Cross the Atlantic

Americans the world over are particularly interested in the birthday of the Canard Line, founder of the first regular steamship service across the Atlantic, first leaving the date of July 4th happened to coincide with their own Independence Day, and secondly because the birth and growth of the steamship has played a major part in the development of America.

When the Canard flag-ship "Aquitania" sailed into Halifax on a short cruise from New York, her arrival marked the ninety-third anniversary of the maiden voyage of the pioneer Canard "Britannia" from Liverpool to America. From then on the history of the Line has been to a large extent the history of trans-Atlantic shipping. The "Britannia" left Liverpool on July 4th, 1840, bound for Halifax and Boston and covering the route in 14 days and 8 hours, carrying 62 passengers.

She inaugurated the first regular steamship service across the Atlantic. Little is known of that first historic voyage except that it was successfully completed and when the "Britannia" bearing her builder, Samuel Cunard, arrived at Halifax and Boston, he was received with the wildest enthusiasm which expressed itself in hundreds of invitations to dinner and the presentation of a marvelous silver loving-cup by the merchants of Boston, commemorating the achievement.

Few Canadians realize that Sir Samuel Cunard was born in Halifax and even before founding the Line which bears his name, had by the year 1830 amassed a huge fortune and was head of a fleet of sailing ships plying between Nova Scotia and the West Indies. Knighted in 1859 for outstanding service during the Crimean War, he died in London in 1891, in his 75th year, one of the world's great pioneers.

Cunard came of a United Empire Loyalist family and was one of the leading men in Nova Scotia for many years. The name of his family is still carried on in various parts of the Maritimes.

From the early days of the first fleet of four "little steamers," the "Britannia," "Acadia," "Columbia," "Calabria," the story of the Line as told in "Spanning the Atlantic" by Lawrence Labcock, is a fascinating one. Many celebrated passengers have crossed in famous Canarders, including no less a personage than Mark Twain, whose quaint account of his crossing in those early days is given in a letter he wrote to the "Acadian Recorder" of Halifax, and in his "Innocents Abroad."

It is interesting to know that the Canard Line was the first to obtain a monopoly in carrying British mails to America; to adopt new inventions in hull and engine construction; to provide comfortable quarters for steerage passengers; to communicate by wireless from boat to land and to initiate in recent years the popular "tourist" class.

The story of the race for time across the Atlantic is one which has equalled any other in the history of the nineteenth century. The race was fast and furious. As early as 1856 the "Persia" made the crossing in nine days while ten years later the "Britannia" crossed in 8 days. In 1877 the "Umbric" and the "Etruria" crossed in six days, while in 1884 the speedy "Lusitania" reduced the crossing to one of five days. In this century the celebrated "Mauretania" has crossed across the Atlantic consistently in less than 41 days and even today is the fastest cruise line afloat. For 22 years she held the mythical "Blue Ribband" of the Atlantic, the longest period any ship has ever won this honor.

Canarders have figured in several crises of Empire. Sir Samuel was knighted for the services his ships gave Britain during the Crimean War, while the fleet also served during subsequent troubles and the Boer War, a war service which culminated in the magnificent record during the World War. The present Atlantic fleet of the Canard and Associated Lines, numbers twenty-two, from the "glorious" "Lusitania" and "Aquitania" to the "repulse" and "Asterion" in the Canadian route.

## Making Youths Sea-Minded

Another Task Which German Chancellor Has Set Himself

Making the younger German generation "sea-minded" is one of the multiple tasks which Chancellor Adolf Hitler has set himself. While he has not yet gone as far as the ex-leader with his famous speech "our future lies on the water," which so aroused the British prior to 1914, he and his propaganda minister, Dr. Josef Goebbels, are losing no opportunity to bring the German navy before the eyes of the masses.

The world's most densely populated land is Java.

## Winnipeg Newspaper Union

By Ruth Rogers

AN EXCITING SMALL LITTLE DRESS

So young in mood. She'll love it! Well I guess! It has all the newest features, besides the smart fabrics that fashion it.

Navy blue crinkly crepe silk inspired the original. The sleeves, collar and the help, marvellously in creating an unusual effect in carrot-red crepe overlaid in blue.

Note the wrapped arrangement of the bodice and interesting skirt treatment.

It's easily made and at an unbelievably small cost.

Grey crepe jumper is just the cutest idea ever with yellow and white checked gingham gumpie.

Style No. 505 is designed in sizes 11, 13, 15 and 17 years.

Size 17 requires 2 1/2 yards of 39-inch material for jumper with 2 yards of 39-inch material for blouse, and 1 yard of 35-inch lining.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Dirigible Coming Again

Graf Zeppelin Making Trips To New York In October

The dirigible Graf Zeppelin will make another flight to New York via South America in October if present plans materialize. Dr. Hugo Eckener said.

"Negotiations for the flight have not been completed yet," Dr. Eckener said. "It will be a passenger and mail flight, like our last trip to New York. We will follow our regular course from Friedrichshafen to Pernambuco and then go northward to New York."

The Graf Zeppelin thus far has made 220 flights with a total of 6,000 flying hours. It has transported 8,200 passengers, 32,000 pounds of mail and 47,000 pounds of freight and covered about 100,000 miles. Included in these flights are about ten round trips to North and South America, of which three were made this year.

## Not Much Change

Away back in 1660 Abraham Cowley, of England wrote:

"Gold begets in brother hate;

"Gold in families debate;

"Gold does friendships separate;

"Gold does civil wars create."

The old world hasn't changed so much in some of its troubles.—Winnipeg Tribune.

## Plenty Of Playgrounds

Canada Has Eighteen National Parks Covering 11,500,000 Acres

The recent official opening of Riding Mountain National Park, in Manitoba near Neepawa, adds 1,148 square miles to the area reserved in the Dominion as national playground for all the people. There are now eighteen of these national parks throughout Canada, with a total area of 18,000 square miles or more than 11,500,000 acres. They are sanctuaries for wild life, refuges from the hustle and bustle of affairs, and as the population grows they will be appreciated more and more by those periodically overwhelmed by a desire to "get away from it all."

Riding Mountain Park is 178 miles from Winnipeg and may be reached by good roads from the international boundary. It is a natural home for elk, moose, deer, black bear and beaver. There is a herd of 2,000 to 3,000 wild elk, probably the largest in Canada. There are golf, tennis, swimming and boating, and for those who want the forest, numerous trails lead to bring one into an encounter with the roaming elk. These ought to be enough qualifications for any one park.

Eighteen national parks offer eighteen magnificent vacations in infinite variety for the tired worker, who craves the open spaces. In a few of them, such as Banff and Jasper, he may dress for dinner if his inclinations move him that way, but for the most part they are handed over to the people pretty much as Nature left them. Ottawa Journal.

## Whaling Industry In Canada Is Reviving

Stocks Of Oil Depleted And Season Likely To Be Prosperous

Canada has come back into the whaling industry this year with the resumption of operations on the Pacific coast after two years when the whalers stayed in port because world market conditions made satisfactory returns unlikely. In other countries, too, there was curtailment of operations in 1931 and 1932, but with the stocks of oil now reduced, the outlook for the industry is believed to be more favorable.

Some half dozen different kinds of whales are taken in British Columbia whaling, which is centred off the Queen Charlotte Islands, and the total catch made in 1930 yielded oil, whalebone meal and fertilizer having a market value of \$228,000. Many of Canada's whale oil production, by the way, is exported to the United Kingdom and the United States.

Of the different British Columbia whales, the fin and the sperm are the most plentiful. Specially, the latter is much sought after for its oil. In 1920 when 147 sperm whales were captured against only 62 fins. The other varieties taken are the hump, sei and sulphur, and the occasional bottlenose.

## Many Will Not Agree

That People Would Feel Lost In World Without Pain

We generally take as if pain were an unmitigated evil. We try to avoid it; we groan under its infliction; we protest against it; we try to imagine a better world in which it would have no place. And yet, what a poverty-stricken world that would appear! How soon we should regret the loss of that which we now deplore? For not only does pain educate our faculties and stimulate our energies, it is so necessary to our very joy that we seek it for ourselves. Half the interest of our sports lies in the call which they make upon our endurance.

Nay, a painless world would lack some of the finest elements which dignify human nature: for it would offer no scope for patience or courage, for sympathy or charity, for temperance or generosity or self-sacrifice. Pain is so closely woven into the whole texture of our active lives that we should feel lost without its bitter-sweet companionship. To be free from suffering is a blessing from which suffering is to be less, not more, than human. Canon Glazebrook.

If you are looking for reward it is better to be a premancher than a premancher.

It is indeed a poor man who says money is his best friend.

Saskatchewan  
Natural Gas

Drilling Commences In Dirt Hills Area Of Province

After \$40,000 had been spent in testing the structure, Highwood Sarsco Oil Limited, Calgary, has pushed forward immediate plans for drilling for natural gas in the Dirt Hills. The company has secured controlling interest in 14,000 acres approximately 30 miles south of Moose Jaw and 50 miles southwest of Regina.

A contract for drilling the first well has been given to the Sheldon Burden of Canada Limited, work has already commenced and actual drilling operations started.

The company is equipped and prepared to go to 4,000 feet if necessary but it is anticipated gas bearing strata will be reached long before that depth. The area has been tested geologically and geophysically and last year a thorough survey by the latest seismicographic method was undertaken.

The results confirmed previous investigation and if expectations are fulfilled a supply of natural gas easily available for both Regina and Moose Jaw should be developed by the fall months, the company says, in its official statement.

A great deal of geological work has been done in this area, which has been favorably reported on by leading geologists, and the present development work is being undertaken as a result of a favorable report on the seismicographic survey made last fall by Geophysical Service Corporation of Dallas, Texas, which is the same company that did the work for the Nordon Company on the Twin River structure, which has just recently completed its well.

President of the Highwood Sarsco Oils is A. W. Dingman, the father of gas and oil development in the district of Calgary and a pioneer in Turner Valley, to whom much of the subsequent development is due. The company is strong financially and well able to carry out its undertakings.

Japan Needs Markets  
More Than Territory

Chinese Trade Is Necessary To Support Growing Millions

Japan last year added more than a million to her population in the same interval that 1,500,000 more people as Germany on a territory only five-sixths as large; and Germany is among the most crowded of nations. There is only one other big power that registers such annual gains, and that is Russia. There the annual increase is about 1,000,000, the population two and a half times as large as Japan's. The latter has a death rate twice as high. Birth control in Nippon is as yet unknown.

It does not follow that population pressure in Japan justifies recent methods in her territorial expansion. Emigration is comparatively a trickle and cannot solve her problem. Her growing millions can be supported only by progressive industrialization and growing foreign markets. In this sense Japan needs the good will and trade of the Chinese people more than she needs Chinese territory.

## Idea Originated In Canada

Canadian National Steamships Offered Cut Rates To New York Woods

Before Mussolini

Premier Mussolini last year offered a ten per cent reduction for homeward-bound Italian airways but a few months before his cut-rate was introduced the Canadian National Steamships had come to the rescue of new-landers in Canada, according to Thomas Cree, passenger manager. The company has now has a fare reduction of ten per cent, available to all couples, alone during a week of their wedding day and the offer is a effect again this year.

## Abolishing The Shuns

For England and Wales the Minister of Health has launched a campaign to wipe out the shuns in five years. In Scotland the Department of Health is at present working on a three-year program which is operating with great success. Scotland has no outbreaks. England and Wales in shun clearance.

# Occasional Wife

Author of  
"JORETTA"  
"LIPSICKER GIRL" etc.

## SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder.

(Now go on with the story)

## CHAPTER II

"Miss Hoyt," a man's vibrant voice pleaded, "may I apologize? I'm sorry if I offended you in class today."

Camilla dabbed frantically at her teary eyes with a square of bright linen, then raised her head reluctantly. She could not meet Peter's eyes.

"Well, if you think I'm crying about that," she finally managed in a husky voice that stung with sarcasm, "you need not trouble to apologize. You presume a lot to think I even remembered it, don't you?"

"Oh, I'm sorry," he hesitated. "But if you are in trouble—that is—may I help you?"

To his amazement and relief, she laughed suddenly and looked up into his face as he bent over her anxiously. Her tear-wet eyes dazzled him, white and shining like a child's, and the tumbled black hair was like a cloud around her laughing face where the sun had just appeared.

A man in livery opened the door and scrutinized him.

"Well, my trouble isn't sketching still-life objects," she said, "but do worry about me, I'm all right. Just the blues, I guess."

His eye twinkled with a spontaneous humor and he sat down on the bench beside her. "What kind of blues, Linchouse, St. Louis or any particular brand? I might know the cure."

"Just the blackie-blues. Now there's a new idea for a new blues song, if your ambitions to write a radio hit."

He shook his head, smiling. "I need all my inspiration for clay figures."

"Oh," her voice held ease. "You're a sculptor."

"Well, that's what I want to be. It happens that I've studied with Professor Drake before, and am finishing next month. I only went into this sketch class for critical training."

"No wonder you laugh at us."

"Not at all. You have me wrong, Miss Hoyt. I wasn't laughing at you really."

"Laughing with me, then?" she

suggested, with a quizzical lift of her chin.

Peter chuckled with relief. "That's better," he declared. "Whose head were you sketching—the prof's?"

"No—yours."

"Mine?"

"Yes. I think it is a beautiful head and I couldn't resist sketching it. Besides, it was right in the way so I couldn't see the old study-object, anyway."

"I'm sorry. Why didn't you tell me?"

"Because I didn't care about sketching still-life, anyway. I much prefer living models."

"You'll get that next year."

"There'll be no next year here. I'm not studying to be a famous artist with immortal ambitions and all that."

"I didn't suppose you were," he admitted, suddenly more aloof. "The idea that anyone could be serious about ambition probably amuses you."

She hesitated a moment before replying thoughtfully. "Not at all. It interests me, very much." Her earnestness was almost reassuring.

"And you are serious, aren't you?"

"Dead serious!" Peter declared.

"Why, I—," he hesitated, then changed the subject abruptly. "But I'm just as serious about something else that I'd rather talk to you about, but don't laugh at me even if you do refuse me. Will you let me entertain you some evening?"

**muddy skin**  
Act at once!  
Incomplete elimination is poisoning your blood. Take Eno every morning.

**TAKE ENO'S FRUIT SALT**

her and actually seemed to be interested. She would wait, she resolved, until she knew him much better, to tell him about herself. By that time, it might just be possible that he would not be frightened away even by her confession.

She said casually, "well — 'Too Many Girls' is playing at the Majestic. You may just be lucky enough to get tickets yet for tonight. And there's the Maddox club for supper, if you prefer famous food and hot music to hot food and famous music."

Peter stood up to cover his confusion. Both the food and the music were of minor importance to him. But if those expensive items were the price tags for Camilla's company, he would have to meet them, somehow. "Fine! I'll run along now and 'phone for reservations," he attempted elaborate "sounded." "Shall I call for you?"

"You know where I live?"

"Who doesn't know? Sure, I'll be seen 'round there."

He saluted briefly, turned into the parkway and strode away. But his smile came to an anxious frown as soon as he was out of Camilla's sight. Orchestra seats at the Majestic and supper at the Maddox club, if he preferred famous food and hot music. He did, if he could afford a preference. But he couldn't! Such an expensive expenditure covered Peter's allowance and expenses for a week.

What to do, now? Hadn't he leaped into a devil of a mess, just such as he had been forcing himself to avoid for two months? Didn't he, Peter Anson, making his own way to a career, know better than to get mixed up with snooty girls like Camilla Hoyt, whom it cost a fellow a fortune to entertain? He did. Then, why hadn't he watched his step? Well — what were you going to do about it when you discovered that Camilla Hoyt was the most adorable and desirable creature in the world and you were mad to be near her, at the same time you feared her?

Professor Drake had precipitated the avalanche upon him; his coming upon her in the park in tears had engulfed him. And here he was scarcely daring to breathe and wondering how to escape from his new dilemma.

He shoved his hand into his trouser pocket, knowing that it would encounter only a few pieces of change. He poked his finger into his vest pocket, knowing that a lone deposit in his name at the bank, put there thriftily and with sacrifice, to meet emergencies. Peter smiled ruefully. Was this an emergency? It was, and it wasn't. If he could bring his conscience to admit the first thought and deny the second.

By eight o'clock he had soothed his conscience, withdrawn half of his emergency fund — he had pledged himself to return at least half of it to the bank the following day, but he had to flash a roll, didn't he? — related a success and a fasten, and was ringing the doorbell at the imposing Hoyt mansion across the park from the art school.

A man in livery opened the door and scrutinized Peter with practiced caution.

(To Be Continued.)

Mrs. Patience Round, who recently celebrated her 102nd birthday in Cradley Heath, England, was a chain smoker for 70 years.

## "Miracle Fountain" Still Flows

Lightning Brought Water To Georgia Prisoners 70 Years Ago

The "miracle fountain" of Andersonville, Georgia, is still flowing. 70 years after lightning brought water to the wilderness in time to save a multitude of federal prisoners, dying in a hostile land. There is a monument there now, on the scene of American civil war strife. It's a national shrine.

More than 12,000 Unionists died at Andersonville, where there was a stockade in which 45,000, many of them wounded, were herded.

Sanitation was the prison's greatest problem—that and the prisoners who looted and stole their comrades. The scarce water supply at Andersonville was contaminated.

August and a relentless Georgia sun scorched prisoners and their Confederate guards alike. Some prayed; some sang. A black cloud dropped over the stockade and tore away the earth almost in the centre of the prison yard. Water gushed from the hole—enough for all. Years after the war somebody remembered the spring and dug it out, now around it. The water still flows between the graves and keeps richly green the grass on hero-mounds.

## THE RHYMING OPTIMIST

By Allie Michaels

### THE YEAR

I thrilled with joy in May,  
When all the land was gay,  
When all the multitude  
Of birds in field and wood  
Lifted their songs in glee  
Pom hedgerow and from tree!  
When every road up-hill  
Lured me to journey still,  
To climb each swelling crest,  
Better to view cast, west,  
The sun-wet world, so fair,  
No sorrow could be there!

But springtime could not stay,  
Nor the child-hike of May.  
Though in life's summer-time  
The deeper notes must chime,  
They sound a braver tune,  
Ringing through golden June!

And mellow in the fall,  
The songs of living call,  
Richer for memory  
Of joys that used to be.  
Even when as it goes  
To some sweet measure flows:  
Winter, though grin and chill,  
May move to music still!

## Arranging Huge Air Derby

Race From England To Australia Starts In October, 1934

One of the events of the Victorian centenary celebrations is a great air race from England to Melbourne. Conditions have just been issued.

Cash prizes totaling \$15,000 and a gold cup valued at £500, are offered for championship and handicap events and each pilot who completes the course within 36 days will receive a gold medal. The races will start on October 20, 1934, from several aerodromes in England, and will finish at Flemington.

Any number of machines may be entered by one competitor, and the same machine may be entered for both races, but only one amount of prize money will be payable in respect of each machine.

There is no limit to the number of members of crews, including passengers. Each machine must carry sufficient food and water to maintain life for three days, approved flotation gear for the pilot and every member of the crew, and not fewer than six smoke signals.

### Had Good Reason

Two men who had attended the village church were discussing the service.

"The vicar certainly preached a wonderfully strong sermon on vanity and extravagance," said one.

"Yes, and his own wife sitting right in front of him, wearing her new dress and new hat," put in the other.

"Oh," said the first, "that explains it! I wondered why he was so worked up."

Less than one-twentieth of the people in Britain now pay income taxes.

Argentina is considering the creation of a national grain commission.

## Little Helps For This Week

"He that is faithful in that which is least is faithful also in much."—Luke 16:10.

The trivial round, the common task, Would furnish all we ought to ask; E'en to us daily carries a road To bring us daily nearer God.

—J. Keble.

Exactness in little duties is a wonderful source of cheerfulness. We are too fond of our own will. We want to be doing what we fancy, and mighty things; but the great point is to do small things when called to them in a right spirit.—R. Cecil.

It is not on great occasions only that we are required to be faithful to the will of God; occasions constantly occur and we would be surprised to perceive how much our spiritual advancement depends on small obediences. The unremitting retention of simple and high sentiments in any duty is hardening the character to that temper which will work with honor under all conditions.—R. W. Emerson.

## Caring For Cut Flowers

Many Ways Of Keeping Blooms Fresh For Days

Everyone knows the old tip of putting an aspirin tablet in the water as a pick-me-up. But do you realize that the flowers must be given fresh water after an hour or so, or the drug may have the opposite effect? Another remedy for flowers that have been out of water for some time is to jar the stems, plunge them into a jar containing two or three inches of hot water, and keep them in the dark for an hour or two. But this will be useless unless you cut off the dead pieces of stem before putting the flowers in the vases. Tulips that bend over with the weight of their heads are usually treated by wrapping in stiff paper. But do you know that you can stiffen the drooping stems with starch? Put a small piece in the water and watch the result.

## An Egyptian Pool-Bah

Professor Finds Grave Of "First Man Under the King"

Professor Selim Hassan, working on behalf of the Egyptian University, has discovered in the course of his excavations of the so-called Fourth Pyramid the grave of a veritable Pool-Bah of the Fourth Dynasty. Selim in the tomb describe him as Director of Finance, Keeper of the King's Food, Great Priest, Judge and Governor, District Director, and First Man under the King. Just as, and other utensils to the number of sixty were found in the tomb, many of them being of beautifully polished copper. Round the neck of the Pool-Bah was a thin gold thread, while on his left forearm he wore a piece of turquoise and a bracelet of gold gold.

Saskatchewan is recognized leader among the provinces of Canada in social and public health legislation.

"The modern girl seems to wear her heart upon her sleeve. In fact, she often seems to wear a sieve."

## SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more wearing, for women, than the daily round of household duties? You have no time to be tired, and you are tired all the time. You cannot stop. There comes a time when something extra and you find yourself simply worn out.

Lydia E. Pinkham's Vegetable Compound will help you. Its tonic action will give you renewed strength, and will make your daily tasks seem easier to you. 50 out of every 100 women who report that they feel better after taking the medicine. Buy a bottle from your druggist today . . . and watch the results.

## Vacation School Report

The Community Vacation Bible School sponsored by the churches of Didsbury, held its closing exercises at Knox Church last Friday evening. The mayor's representative Mr. W. A. Austin, who acted as chairman, added much to the evening's enjoyment by his lively humor and sympathetic manner. The program was furnished by members of the school and consisted of recitations, songs and musical numbers, some of which were most original.

After presentation of the diplomas to the seventy-some graduates of the school by the chairman, a small gift of appreciation was bestowed upon Miss Lola James, of Calgary, principal of the school and superintendent of the junior department, and her assistant, Miss Nora McDonald, of Calgary, superintendent of the primary department. In their response they stated that they considered the school had been a great success and expressed the desire that they might have the privilege of sharing in the work another year. After the program the guests repaired to the basement to view the exhibition of handwork.

The school has been in session each morning for the past two weeks, except Saturdays, from 9:15 to 11:30. The daily program began with the salute to the flag and pledge of allegiance. This was followed by a worship period, a period of bible study, a period of supervised recreation, and a period of handwork.

The churches are to be congratulated upon this forward step. We heartily endorse every effort put forth for the benefit of the kiddies. The only regret is that the school did not last longer.

## Liberals Win Election In Nova Scotia

In the election held in Nova Scotia on Tuesday the Liberal opposition led by Angus L. MacDonald swept from power the Conservative government led for the past three years by Premier S. Harrington.

The opposition elected 21 members to 8 for the Conservatives. Victoria County was still in doubt on Tuesday.

The Liberal victory ousted a Conservative administration which had held power since 1925, when Hon. E. N. Rhodes led the Conservatives to a 40 to 3 triumph.

With Premier Harrington, only two members of the Conservative government's executive council were returned. They were Percy Black, minister of highway, in Cumberland, where the result was split, and Hon. Joseph MacDonald in Cape Breton North.

Crossfield has a live board of trade. At the luncheon held last week the secretary reported the membership at 151.

## Marshall May Run for Ontario Seat

Prominently mentioned as a possible Liberal candidate for Peel County in the forthcoming Ontario provincial election is Hon. Duncan Marshall, former Alberta minister of agriculture. It was expected his name would be placed before the Liberal convention held last Friday, and at which Mitchell F. Hepburn, provincial Liberal leader was the speaker.

### NOTICE

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that a Red Steer Calf about 10 months old, no visible brands, white feet, white under stomach, was impounded in the pound kept by W. J. Scheidt, of Didsbury and located on the N.W. 16-31-5, on July 11th 1938 and that said animal was sold on the 22nd day of July, 1938 to John Bogner, of Didsbury.

Said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette upon payment of all fees and costs due to the municipality and the purchasers of said animal.

For further information apply to the undersigned.  
A. BRUSSO,  
Sec.-Treas. of the Municipality of Mountain View, No. 310.

**VICTORIA THOMSON, L.R.A.M.,**

Teacher of Piano, Theory, Etc  
Will Reopen her Class at Didsbury

## LOCAL & GENERAL

Mr. Norman Weicker, of Vancouver, arrived here Tuesday to take care of his business interests in the district.

The subject of the sermon at Zion Evangelical Church next Sunday morning will be, "Qualifications for Christian Service," and in the evening, "Zaccheus Seeks Salvation."

Alf Brusso, Cyril White and Fred Evans returned Thursday last from a motor trip to the lakes around Edmonton. They had various motor mishaps along the way, but returned home happy.

### Melvin Notes

Miss Helen Moon, of Didsbury, spent last week with Mrs. A. Krebs.

Miss Florence O'Brien returned from her holiday at Vancouver last week.

Mr. and Mrs. Harold Bliss, of Bowden, spent Sunday with Mr. and Mrs. A. Krebs.

Misses Dorothy Young and Florence O'Brien are spending a few days at Dornica.

Mrs. E. B. Parker entertained a number of lady friends at her home on Thursday afternoon.

Mr. and Mrs. Roscoe Irwin have moved to their new home at Delburne Alberta.

Lester Krebs spent last week at Bowden with his sister, Mrs. Harold Bliss.

Mr. and Mrs. John Murray, of Murray Valley, and Mr. and Mrs. Jim Murray, of Sudgewick, called on Mr. and Mrs. Peter Johnston last week.

Mrs. Peter Johnston and Mrs. Chas. Young, Marian Johnston and Dorothy Young, spent Wednesday with Mr. and Mrs. J. Manson at Elkton.

Mr. Geo. McNair and young son, of Durham, Cal., have returned home after visiting with Mr. and Mrs. A. W. Wahl and renewing old acquaintances in the district. The old friends were much pleased to see Mr. McNair, as it is several years since he left here.

### Burnside Notes.

Lone Pine W.I. met at the Hall on Thursday last, when Mrs. N. Eckel was hostess. Mrs. W. Lyons gave a splendid paper on "The Creed." It was decided to drop the September meeting and meet with Mrs. Bert Pross in October.

Mr. Herman Ohlson spent a few days last week in Calgary.

Mr. Fred Metz spent Sunday with Mr. and Mrs. Bert Pross.

Mr. Bob Springguy was a Sunday visitor at Mr. N. Eckel's.

Mrs. Chas. Marden returned on Friday from a visit with Calgary friends.

Mrs. A. A. Dyck, who was operated on recently at the Didsbury Hospital, is reported to be doing nicely.

Mr. Lewis McCulloch left last week for Turner Valley, where he had accepted a position.

Mr. and Mrs. Miller Huston and family, of Allingham; Messrs. Britton Nelson and Happy Hepburn, of Sunnyslope; Misses Violet and Mina Viney, Jack and Bert Viney, were Sunday visitors with Mr. and Mrs. Noah Eckel.
